

Recreational

Client:

The Corporation of the City of Brampton

Architect:

Page + Steele Inc.

Location:

Brampton, Ontario

Project Details:

Aecon is the Construction Manager for the 60,000 square foot new Brampton Performing Arts Centre. This 2-storey building features an 800-seat performance hall, a 200-seat community hall, associated circulation spaces, public facilities, lounge/lobby areas, back-of-house facilities and support/admin facilities. The facility is being built to accommodate live and taped television broadcasting of their events. There are approximately 8 camera locations and a live mix location as well as a tie into mobile production trucks.

This facility is the focal point of an ongoing redevelopment of Downtown Brampton. Significant exterior landscaping is included to create a public plaza frontagesimilar to old style European theatres.
